

November 2010

Preschool and School age Programs

Kids Come First has expectations that all 3 & 4 years old and all school age children are trained in toileting before starting the program.

Children on occasion may wet or soil themselves while at the program. The following are steps that the staff will take if your child has an "accident":

-A child who wets them self, will be guided to the washroom, and given extra clothes to change into. Wet clothes will be placed into a bag and returned to the parent. Staff will not clean a child who is wet.

-A child who soils them self will not be changed by a staff at the program. The child's parent will be called to either change the child or take the child home.

We will encourage the children frequently to "try" and use the washroom throughout their time at the program. Children will be expected to wipe them self after using the toilet.

If your child frequently has accidents please ensure that a change of clothes is kept in their backpack.

Toddler Program

It is understood that toddler children will not be toilet trained at this age; however we expect that all children come to the program clean. Toddlers who soil them self will not be changed at the program. A parent will be notified to return to the program.

Things you may do to help your child at the program:

Please take your child to the washroom before the program begins; remind your child to ask when they think they need to go; talk to a staff if you think your child needs extra reminders to use the washroom and teach your child how to clean them self after using the toilet.

Please return the bottom portion to the program after you have read and signed this form.

Kids Come First Toileting Policy

November 2010

I have read and understand the above policy
